

National FAA Safety Team presents:

# **AirVenture 2023 Seaplane Base Forum - Low Level Weather Information Sharing**

Seaplanes comprise a small sector of aviation, so their unique weather needs may be inadvertently overlooked, therefore there may be opportunities to enhance existing weather products and information as well as their rendering in cockpits to enhance seaplane pilot safety and reduce workload relative to adverse weather avoidance decision-making. The presenters will inform attendees about new advances, research, and innovations related to low altitude weather information. They will also discuss the potential for seaplane pilots to mature evolving weather automation in development for un-crewed aircraft and to identify techniques to build pilot confidence in these new technologies. The presenters will solicit attendees for details about their unique weather related gaps, shortfalls, and challenges. This feedback will assist in prioritizing future weather research.

**WINGS/AMT credit available!**

To receive WINGS/AMT credit fill out attendance sheet available at the Forum entrance.

**Directions:** The daily FAA Safety Forum at the EAA AirVenture Seaplane Base is located under the large tent at 96WI or (N43°56.47'/ W88°29.62'). If you drive, the address is 5202 Streich Lane, Oshkosh, WI 54902. Phone number to the Base is 920-230-7829 (AirVenture week only).

Prior to attending a safety seminar, please review and abide by current CDC, State and local health guidelines.
